# ARGE WG Digitalisation
Training & Information

Webinar BIM for Beginners

BIM Software and Service Examples

Overview | Simplified BIM Use Case Process

Get
- product information
- as bimobjects

Create
- a BIM-Model
- to design the building

Use
- the model to reach goals such as
- sustainability
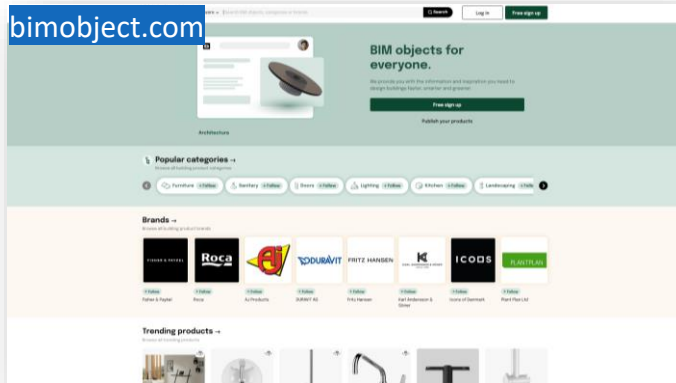

Story: „Architect gets product information as a bim-object and uses it to create a bim-model for the design of the building. The model is later used to optimize the sustainability performance of the building."
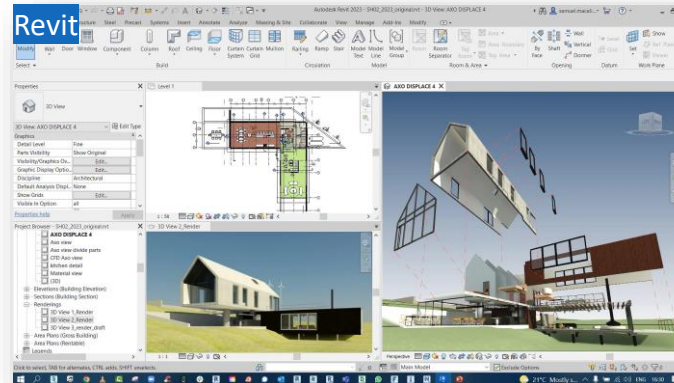

BIM Examples | Get-Create-Use

BIM-Portals
- Webbased Platforms to download BIM-Objects
- Collaboration and Marketing Features

BIM-Software
- Planning Software to create 3D BIM Models
- Different Software for different Use Cases (Infrastructure, Construction, …)

BIM-Services
- Advanced Services that use the BIM Model for
- Optimization, Evaluation, Collaboration
